- **About Me:**
A self-motivated, innovative individual and a team player with a curiosity to learn, an eye for detail and a deep-rooted passion for software development. I am seeking an opportunity to work with a company that will enable me to design, develop and work on creating a rewarding digital experience for users. I have previously worked with CSS, JavaScript, Angular, Git and frameworks such as React and Express (Fullstack). In addition to using Kotlin for developing Android applications, I am proficient in working with databases namely MySQL and Google Firebase.

EDUCATION

- Bachelor of Engineering – Information Technology | Oulu University of Applied Sciences
2019 – 2023
- Baccalaureate Certificate and NEASC Diploma | International School of Helsinki
2015 – 2017

EXPERIENCE

- *Car Repair App / Project Associated with Dilhamr*
MAY 2023 – OCT 2023
A Fullstack Hybrid Web Application for Automotive repair businesses in which employee shifts, tasks, and their status (i.e. In Progress or Done) can be seen and organized by the Manager and Admin.
- *CavokApp Flight Club | Project Associated with Oulu UAS*
JAN 2023 – MAY 2023
A webpage for Flight Clubs wherein clubs can add members, log flight times and receive invoices as per their flight club membership fees. Applied my knowledge of JavaScript and React.
- *Intern Software Developer| ROHM Semiconductor Europe*
MAR 2022 – NOV 2022
Worked on a project as part of the Company-Oriented Product Development courses. Further advanced my Front-End development skills. Worked with C# and its frameworks namely ASP.NET Blazor.
- *Android Chat App | Project Associated with Oulu UAS*
MAY 2021
A chat application I developed for the Android Practical Assignment. The language used is Kotlin and the IDE was Android Studio.
- *Pet Plants E-Commerce Android App | Project Associated with Oulu UAS*
MAR 2021 – APR 2021
Worked with my colleagues in a team on an E-commerce application developed with Java and Kotlin on Android Studio, designed to sell plants as pets.
